

Elias Severino Villegas

Software Engineer - Fullstack Developer

eliasseverinok@gmail.com | Ecuador, GYE (GMT-5) | eliasseverino.vercel.app

Skills

Languages:	JavaScript, TypeScript, C#
Frameworks:	React, Next.js, Express.js, .NET
Databases:	MySQL, PostgreSQL, Oracle, Prisma, Mongo DB
Technologies / Tools:	Docker, Maven, Git, Azure
Practices:	Agile, Scrum, SOLID Principles, Code Reviews

Experience

Vilex Agency, CEO

Fullstack Developer

Feb 2026 – Present

GYE

- I developed and optimized websites and landing pages, improving their performance, responsiveness, user experience (UX/UI), and adaptability across different devices and browsers.
- I resolved technical and functional issues in web projects by implementing frontend improvements, API integrations, bug fixes, and code optimizations to ensure more stable and efficient applications.
- I implemented custom web solutions using modern frontend and backend development technologies, collaborating on results-oriented projects focused on conversion optimization, maintenance, and the continuous improvement of digital products.

Projects

FarmaSYS

github.com/eliasseverinok/FarmaSYS

A multi-tenant web platform for the comprehensive management of pharmacies and drugstores. It enables the management of inventory, products, suppliers, sales, returns, cash handling, payments, customers, and operational reports. Features include a Point of Sale (POS) system, stock and expiration tracking, PDF receipt generation, and subscription management via Lemon Squeezy. It incorporates JWT authentication, role-based access control, and an architecture with tenant isolation. Developed using React, Node.js, Express, PostgreSQL, Sequelize, and Docker.

Education

Universidad de Guayaquil

B.Sc. Computer Science, Software Engineering

2024 – Present

- Academic merit (2nd, 3rd, and 4th semesters)

Languages

Spanish: Native · English: B2 Advanced
